

Abaco

design Metalmobil Concept

Freedom of composition

Abaco is an upholstered multiple seating system: poufs, sofas, corner units and wall panels are the units of a product at the service of design and creativity. Its linear and round modularity and its padded panels are a flexible and combinational system and its diverse available sizes allow to set up and decorate any type of environment.

The possibility to combine 3 colours for the upholstery of the base, of the seat and of the backrest as well as that of the wall panels creates elegant chromatic effects that allow the harmonization between the project and its setting.

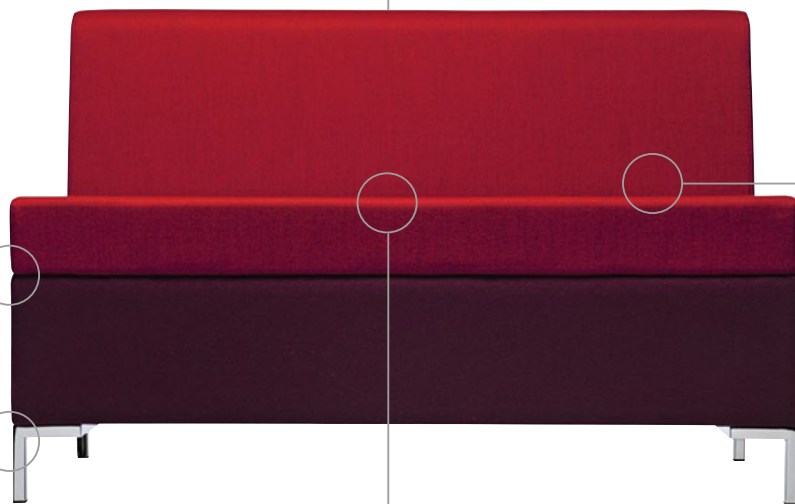

Technical features

Customized upholstery possibility; seat backseat and base can be upholstered in different colour patterns.

Wall fixing system granting Abaco complete re-arrangement at each occasion.

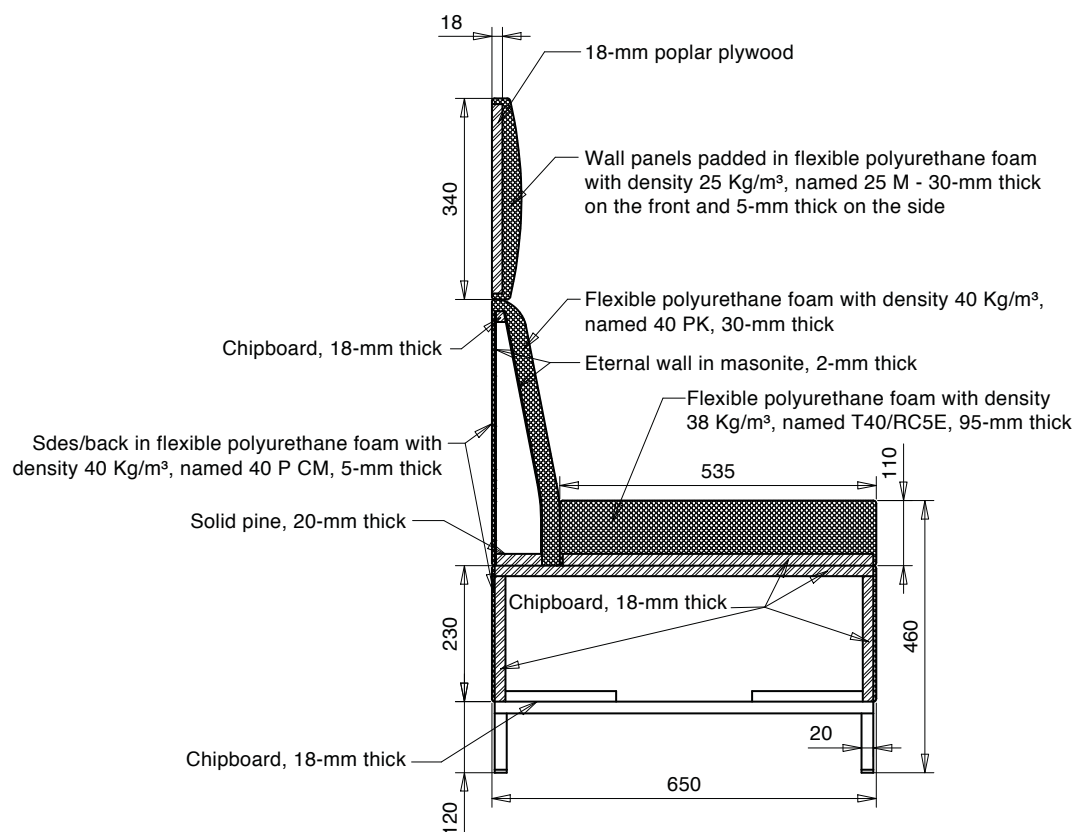

Attention to details: chromed or epoxy-coated feet (16 colour options available from catalogue) keep Abaco well off the ground allowing complete ease of clean.

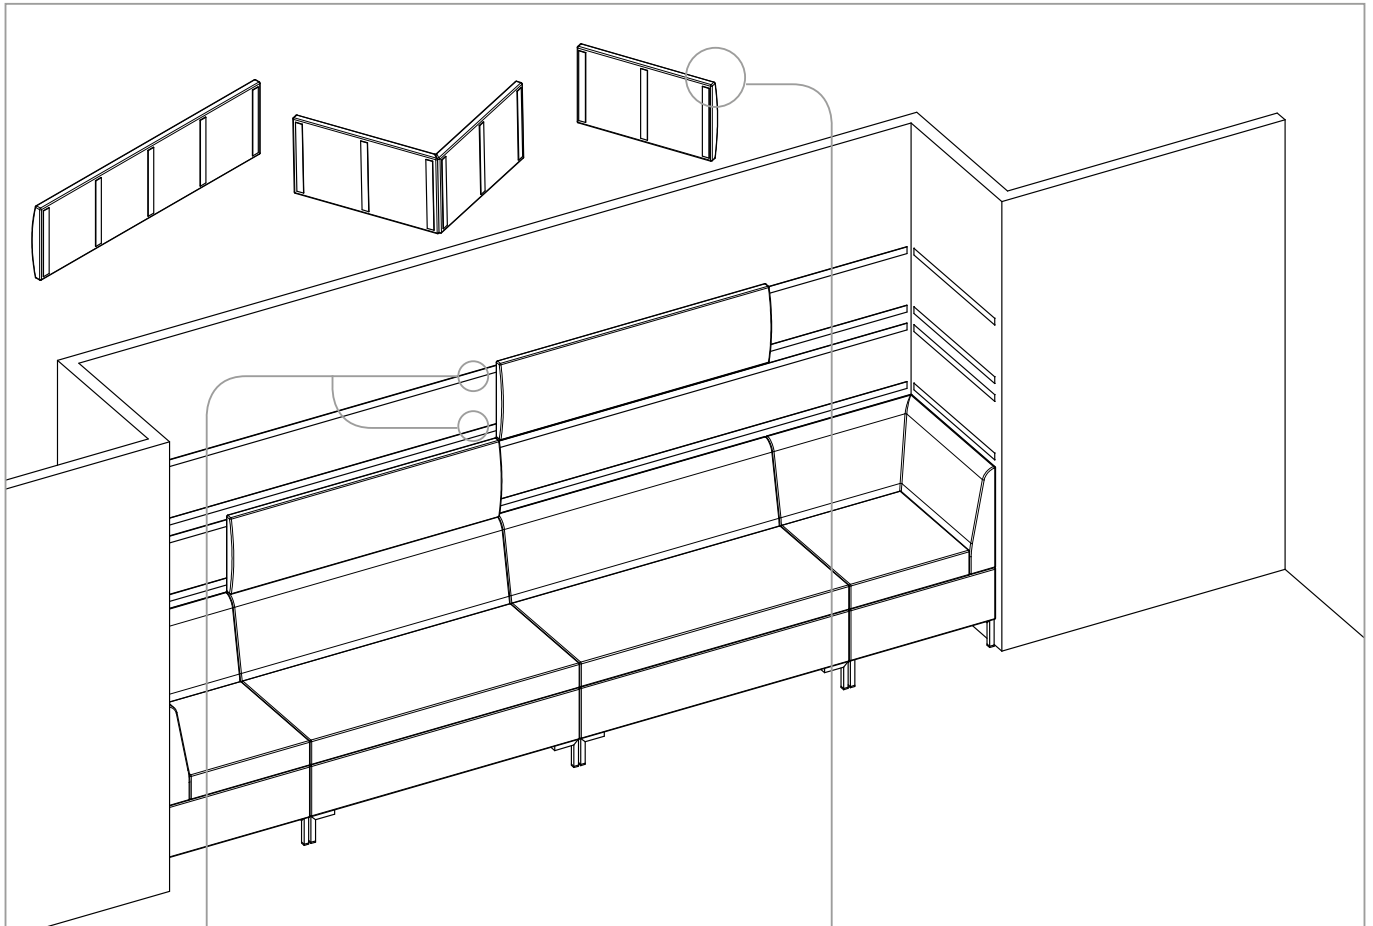

Seat and backseat in foam.

Thanks to its dimensions and customizing qualities (with or without wall panel and modular elements) Abaco is the ideal tool for both dining and waiting areas.

Technical features

The fixing system

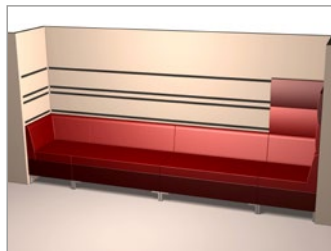

Adhesive Velcro stripes to be horizontally fixed onto the wall in proximity of the upper and lower edges of the upholstered panels.

The panels can be fixed onto the wall by means of Velcro vertical stripes stitched on their back.
