

# Uni-Ka

La poltroncina Uni-Ka di Metalmobil con la sua forma riccamente avvolgente è in grado di trasmettere una sensazione di comfort sofisticato, aggiungendo una nuova prospettiva al mondo delle scocche a pozzetto grazie alla sua texture ad effetto imbottito.

La scocca è realizzata in polipropilene e fibra di vetro ed è riciclabile al 100%. Diverse le tipologie di telaio disponibili: acciaio verniciato, cromato o legno di faggio naturale o tinto.

La versione con scocca in polipropilene ed imbottitura interna in poliuretano rivestita in tessuto è adattabile a tutti i telai della collezione. Le diverse soluzioni del telaio e la tante variabili di colore della scocca e tessuti abbinabili la rendono una seduta passe-partout, ideale per contesti collettività, con particolare attitudine per la ristorazione e l'hotellerie, nonché per il mercato residenziale.

Le ultime nate della collezione, Uni-Ka 601 e 601M, con telaio 4 gambe tonde sono un mix perfetto di acciaio e legno, il cui particolare disegno crea un sottile e leggero gioco di incastri che conferma ulteriormente l'originalità ed eleganza di questo prodotto, tanto da essere stato selezionato, nella versione imbottita, per il premio ADA 2016 "Best of Category" nella categoria Contract.

Uni-Ka armchair by Metalmobil with its richly enveloping form is able to convey a feeling of sophisticated comfort, adding a new dimension to the world of tub chairs thanks to its padded effect texture.

The shell, made of polypropylene and glass fibre, is 100% recyclable. Different frame types are available: painted steel or chrome, natural or stained beech wood.

The polypropylene version with an inside polyurethane upholstered padding can be used with any frame within the collection. The different frame options and the wide colour palette of the shell and matching fabrics make this armchair suitable for most contract uses, particularly for restaurants and hotels, as well as for the residential market.

The last born of the collection, Uni-Ka 601 and 601M, with 4 round legs are a perfect mix of steel and wood, and their peculiar design creates a thin and light play of joints that further enhances the originality and elegance of this product; in fact the upholstered version was selected for the ADA 2016 "Best of category" award.
