

et al.

Dear customers,

We are aware that in order to reduce our impact on the environment, everyone's contribution is crucial, and for this reason we take great care in the choice of materials and the production processes we use. Et al. is committed to reducing raw material waste and choosing sustainable and recyclable materials.

We want to do our part to help preserve our planet, which is why we have made a conscious choice to use eco-friendly materials. Comfort is also crucial for the well-being and productivity of individuals, especially in the office sector where most of the day is spent sitting. From the combination of absolute comfort and care for the environment come Dunk and Agami, the products we would like to present to you.

Agami is a chair designed with durable and sustainable materials, such as beech wood. Moreover, it is easily disassembled for the replacement of damaged parts, thus reducing waste and environmental impact. Agami is an armchair that combines design and functionality. Its minimalist design, characterised by essential lines and a rounded shape, fits perfectly into any environment.

Dunk is an ergonomic chair, perfect for people who spend many hours sitting. Thanks to its curved shape, it adapts perfectly to the shape of the body, offering absolute comfort. Moreover, it is available in different colour tones, perfect for blending in with any furnishing style. Its shell is available in two colours made of recycled plastic, thus reducing its environmental impact; moreover, the dual version of the shell, with holes and without, makes it extremely multipurpose.

We are aware that the office sector is constantly evolving and that comfort has become an increasingly important issue in the working world. In addition, more and more people are looking for products that last and are sustainable.

Workspace 2023 will be an opportunity to see live these two new solutions of ours for a more comfortable, durable and sustainable working experience.

We look forward to seeing you at our stand **C40-D41**.
See you soon!
