seats for living

## ari

design **Philippe Nigro**

**Ari, the latest frontier of style and functionality by Et al.**

The outdoor collection designed by Philippe Nigro

Created under the creative guidance of French designer **Philippe Nigro**, the Ari collection is an ode to **simplicity**, **elegance**, and **versatility**. A play of lines juxtaposed and doubled,

developing in height.

The metal rods, starting from the ground side by side and in parallel, gracefully curve and separate, creating the perfect space and shape to ensure maximum comfort for seating. The frame embraces and accommodates the seat cushion, armrests, and backrest, providing a unique visual and tactile harmony.

Ari presents itself as a true **seating "program"**, characterized by a slender yet robust metal rod structure, designed to accommodate large and comfortable cushions, thus ensuring an unparalleled experience of comfort and relaxation.

Ari's versatility is expressed through a **complete system of modules**, consisting of **linear elements, corners, terminals, armchairs, ottomans, and coffee tables**. This modularity

allows adapting the collection to different needs and configurations of outdoor spaces, offering endless possibilities for customization.
